

# Julián A. Santanatoglia

Frontend Web Developer

[LinkedIn](#) · [GitHub](#) · [Whatsapp](#) · [Email](#)

---

+2 years of experience in Software Development, specializing in Frontend with React based in Almería, Spain. I have worked on several projects using HTML5, CSS3, SASS, Bootstrap, Tailwind, JavaScript, Typescript, Next.js, Git, GitHub, and React, fully managing Hooks, Components, Props, and Routes. Additionally, I have knowledge of databases with MySQL, Firebase, and Microsoft Excel.

I started in the world of programming at the age of 13, combining my passion for video games and technology by developing a private Lineage II server using Java and managing databases with MySQL and Navicat. Since then, I have mastered programming logic and have acquired knowledge in a self-taught manner.

I have also worked on projects with WordPress using Woocommerce, Elementor, and Astra, including hosting and domain setup, authentication, SSL certification, payment and shipping platforms, products, copywriting, SEO positioning, and accessibility. I used Photoshop and Illustrator for wireframes, logos, banners, and product photo retouching.

## WEB EXPERIENCE

---

### [EventLoop](#)

October 2024 - Present

#### Junior Frontend Developer

I contribute to the frontend development of eventloop.club, an online platform for selling tickets to music events.

Implementation and optimization of styles: Applying best practices in CSS, Sass, and Tailwind to ensure a visually appealing and fully responsive user interface, enhancing the user experience across different devices and platforms.

Development of interactive features: Using JavaScript and Angular to design and develop interactive components, managing the dynamic state and behavior of the platform through an efficient and scalable architecture.

Version control and code management: Implementing best practices in version control with Git, ensuring a collaborative workflow and maintaining a clean and easily manageable development history.

### [JSport](#)

July 2024 – August 2024

#### FullStack Developer

I developed a complete Full Stack e-commerce project using React. I implemented key features such as product details, shopping cart, and data storage using localStorage and Firebase, creating a smooth shopping experience. I ensured the scalability and maintainability of the site by applying best practices in data management and code structure, facilitating future updates and improvements.

**Features:**

Product Catalog: Browse a wide range of football t-shirts.

Product Details: Detailed information for each t-shirt, including price and description.

Shopping Cart: Add t-shirts to your cart and manage your products before completing the purchase.

**[GreenBank](#)**

*February 2024 – April 2024*

**Frontend Developer**

I developed a complete frontend project with a modern aesthetic design, integrating advanced JavaScript functionalities to simulate loans with real-time conversion from dollars to euros using an API. This project allowed me to work with multiple technologies to provide an intuitive and functional interface, enhancing the user experience with dynamic interactions and fast response times.

**Features:**

Loan Simulator: Allows users to apply for loans for various purposes, such as buying a house, a car, or going on a trip.

Currency Converter: Calculates the real-time conversion from dollars to euros.

User-friendly Interface: Uses Bootstrap for a responsive and attractive design.

**[JoyeríaDiaz](#)**

*January 2024 - Present*

**WordPress Web Designer**

Design and development of websites using WordPress, Elementor, and WooCommerce.

Complete setup of hosting, domain, and SSL certificate.

Creation of custom web designs with Elementor and the Astra theme.

Graphic design: creation of logos, banners, and product photo editing.

Implementation of payment platforms and management of shipping and returns.

Writing persuasive copy (copywriting) focused on conversion.

Integration of live chat for customer support.

Configuration of analytical tools such as Google Analytics and Google Maps to track web traffic and business location.

**[Prosite.app](#)**

*March 2023 – July 2023*

**Manual QA Internship Contract**

Voluntary Internship at Prosite.app performing the following tasks:

Creating use cases

Test cases

Manual testing

Functional testing

Data migration

Reporting bugs using Jira

## WORK EXPERIENCE

---

### Store Manager & Google Ambassador

Orange™

*Almería, España*

*August 2021 - Present*

Sales Advisor, monitoring store objectives and KPIs, logistics, training new staff on various store management and processing software.

Informing clients about new features of Google applications and updates to the Android operating system.
